

Wind Turbine Technician

Join our team of Wind Turbine Technician's and help us in maintaining the UK's network of onshore microgeneration wind turbines. Together with your fellow technicians you'll be responsible for performing proactive and reactive maintenance including retrofits, major component exchanges, new commissions and emergency breakdowns.

Roles and Responsibilities:

- Perform scheduled and unscheduled maintenance on wind turbines.
- Fault finding, troubleshooting and repair.
- Report all work conducted accurately and in suitable time: observations, timesheets, repair & service sheets.
- Perform all work with a high level of quality and attention to detail.
- Stock take, be responsible for materials on site and keeping vehicle stocked and well equipped.
- Good timekeeping.
- Good customer communication and on-site housekeeping.
- Repair and refurbish turbines in our Workshop.

Why work for us:

- 30 days annual leave with increase every year employed.
- Annual performance bonus.
- Full training provided.
- Pension scheme.
- Rate of pay £15.00 - £18.00 dependant no experience

Job Requirements:

- Full UK driving license.
- Category C lorry license would be desirable.
- A background in engineering or agriculture would be desirable.
- Previous experience of mechanical or welding work of benefit.
- Willing to travel and spend time away from home as and when required, with subsistence being paid.
- Predominantly hydraulically lowered turbines but some climbing may be required – training will be provided.

Schedule/Location:

- Based out of our Orkney Workshop with periodic work away from home.
- Normal working hours are Monday to Friday 8.00am – 5.30pm.
- Weekend work available.
- Closing date 10 September 2026.

Apply by emailing enquiries@northernturbineservices.co.uk with your CV.
